## Product Description

Whether you're in need of new or second-hand trucks, we're here to tailor tractors to meet your specific transportation requirements. Choose from a variety of loading weights, volumes, and colors to optimize your operations. A reliable truck ensures efficient performance and smooth operations.

### Product Description OF Shacman Tractor Truck:

Our tractors are designed for towing and pushing heavy trailers, equipped with powerful diesel engines and either mechanical or hydraulic transmissions featuring high-speed ratios and main reducers. Some models also include wheel side reduction devices for improved traction control.

Compared to others, SHACMAN tractors stand out for their efficiency, safety, comfort, and integration with intelligent networks. They offer high efficiency, low fuel consumption, and intelligent features, with engine options ranging from 10L to 13L. The cabins are equipped with four-point airbag shock absorption, Grammer air seats, and advanced noise reduction technology. Manufactured with precision, the vehicle bodies are robotically welded by ABB robots, ensuring a 100% automation rate with precise welding and uniform solder joints. This process ensures structural integrity, preventing deformations and enhancing impact resistance under harsh conditions.

Additionally, SHACMAN tractors feature aluminum alloy three-stage pedals with pedal lights and slip-protection. The use of polyester materials in the cabin significantly reduces noise levels and improves insulation.

### Product Application OF Shacman Tractor Truck :

The Container Tractor Truck's cab top has undergone strict pressure resistance test, with excellent safety performance and better guarantee in product quality. Its thickened cab steel plate and side door crash beam design effectively enhance the passive safety of the cab. This tractor truck can meet basic transportation needs and tackle some complicated tasks.
