Product Description

Product Description of Shacman Tractor Truck:

The SHACMAN tractor is designed for the demanding task of towing and pushing heavy trailers. It is powered by a high-capacity diesel engine and offers both mechanical and hydraulic transmission options with high-speed ratios and main reducers. Certain models also come equipped with wheel-side reduction devices to improve traction control.

In comparison to its competitors, SHACMAN tractors stand out in terms of efficiency, safety, comfort, and advanced network integration. These tractors boast high efficiency and low fuel consumption, with engine options ranging from 10L to 13L. The cabin is equipped with features such as four-point airbag shock absorption, Grammer air seats, and noise reduction technologies like double seals, enhancing overall comfort and reducing operator fatigue.

SHACMAN tractors are manufactured with precision, utilizing 100% automated robotic welding by ABB systems, which ensures high welding accuracy, uniform joints, and superior structural integrity. This process guarantees that the vehicles can withstand challenging conditions and maintain impact resistance.

Additionally, SHACMAN tractors are fitted with practical features including aluminum alloy three-stage pedals with pedal lights and slip-protection. The use of polyester materials in the cabin significantly reduces noise levels and improves insulation, creating a quieter and more comfortable environment for operators.
