Product Description of Shacman Tractor Truck:

6x4 Container Tractor Truck is the general large truck or semi-trailer that is pulled by tools between the front end and the car box. It is often used for the transportation of large quantities of goods within or between workshops, such as the transportation from the warehouse to the assembly line in the automobile manufacturing industry and the baggage transportation at the airport. The braking system of the tractor truck is basically the same as the braking system of the truck, the difference is that the tractor is set up to deliver compressed air to the trailer pneumatic brake line, emergency brake line, start control line and air hose connector, etc.

Product Application of Shacman Tractor Truck :

The cab of the Container Tractor Truck has passed rigorous pressure resistance tests, ensuring exceptional safety performance and high product quality. Its reinforced steel plate and side door crash beam design significantly improve the cab's passive safety features. This tractor truck is capable of meeting standard transportation requirements while also handling more complex tasks.
