Product Description O Shacman Tractor Truck:

A tractor used for towing and pushing heavy trailers. It is equipped with a high-power diesel engine, and is equipped with a mechanical or hydraulic transmission with a high speed ratio and a main reducer. Some also have wheel side reduction devices to reduce speed and increase traction.

Compared with other tractors, SHACMAN tractors are more efficient economy,safety,comfort and intelligent network federation.

High efficiency, low fuel consumption, intelligent, comfortable, matching 10L,11L,12L,13L engine, four-point airbag shock absorption, grammer air seat, double seal and other noise reduction design.

The vehicle body is automatically welded by robots from the world's top ABB company. The main welding automation rate is 100%. The welding accuracy is high, the solder joints are distributed evenly, and there is no phenomenon such as de-soldering and false welding. It can ensure that there will be no open welding deformation under harsh environments and impact resistance.

Aluminum alloy three stage pedal equipped with pedal lights and slip-protection.

Application of polyester material can reduce cab noise greatly and increase insulation qualities.
