Product Description

There are both new and second-hand trucks. Just tell us your transportation needs and we will customize tractors with different loading weights, volumes, and colors. A good truck will help you work well.

Product Description of Shacman Tractor Truck:

The advantage of the extra-high cab is that the entire cab space is very large, and the flat floor design makes it easy for drivers and passengers to move around in the cab without any challenges.

The X6000's pipeline layout and workmanship are very well done. All pipelines under the front cover are designed with fixed buckles, and there are anti-friction brackets between multiple pipelines in the same part, so that abnormal wear will not occur when the vehicle is bumping up and down, improving reliability.

The main driver's seat uses Yisiling's high-end seat with ventilation and heating functions, and the seat back supports two-stage adjustment. The integrated seat belt can reduce the friction caused by up and down bumps during driving and improve driving comfort.

Product Application of Shacman Tractor Truck :

The Container Tractor Truck's cab top has undergone strict pressure resistance test, with excellent safety performance and better guarantee in product quality. Its thickened cab steel plate and side door crash beam design effectively enhance the passive safety of the cab. This tractor truck can meet basic transportation needs and tackle some complicated tasks.
