Product Description

There are both brand new and second-hand trucks. Just tell us your transportation needs and we will customize tractors with different loading weights, volumes, and colors. A good truck will help you work well.

Product Description of Concrete Pump Truck:

The pump truck consists of five parts: boom, pumping, hydraulic pressure, support and electronic control. [1] The concrete pump truck is modified on the chassis of a truck. It is equipped with motion and power transmission devices, pumping and mixing devices, distribution devices and other auxiliary devices on the chassis. The power of the concrete pump truck transmits the power of the engine to the hydraulic pump set or the rear axle through the power transfer case, and the hydraulic pump pushes the piston to drive the concrete pump to work. Then use the distribution boom and delivery pipe on the pump truck to transport the concrete to a certain height and distance.

Product Application of Concrete Pump Truck :

At present, the main products include 28m, 31m, 33m, 38m, 50m, 58m, and 65m concrete pump trucks and 28m, 38m, 44m, and 46m mixing pump trucks, 24m, 36m, and 47m aerial work vehicles, 10-50 ton bulk cement trucks, mobile unloadable mixing stations and other engineering machinery equipment; the country's first two-axle 38m pump truck, 46m mixing pump truck, four-axle 65m pump truck, cement truck, mobile unloadable mixing station and other star products.

Dedicated to serving urban and rural infrastructure, it is an enterprise specializing in the production of large-scale construction engineering machinery and equipment, integrating scientific research, production, sales and after-sales service.
