Product Description

There are both brand new and second-hand trucks. Just tell us your transportation needs and we will customize tractors with different loading weights, volumes, and colors. A good truck will help you work well.

Product Description OF Concrete Pump Truck:

When the pump truck is running, do not open the hopper screen, water tank cover and other safety protection facilities, and do not put your hands into the hopper or water tank or grasp other moving parts with your hands.

When pumping, it must be ensured that the concrete in the hopper is above the foot plate axis to prevent concrete spraying caused by inhaled gas.

When the pipe is blocked, the pump must be reversed to release the pressure in the pipe before disassembling the concrete pump pipe.

Maintenance and repair work can only be carried out when the pump truck is placed on stable ground and ensures that no unexpected movement will occur.

Maintenance and repair work can only be carried out when the boom is retracted or reliably supported, the engine is shut down and the outriggers are secured.

Before performing maintenance, the machine must be shut down and the accumulator pressure released. If the boom hydraulic lock is opened without first fixing the corresponding boom, there is a risk of the boom falling and injuring people.

Product Application OF Concrete Pump Truck :

At present, the main products include 28m, 31m, 33m, 38m, 50m, 58m, and 65m concrete pump trucks and 28m, 38m, 44m, and 46m mixing pump trucks, 24m, 36m, and 47m aerial work vehicles, 10-50 ton bulk cement trucks, mobile unloadable mixing stations and other engineering machinery equipment; the country's first two-axle 38m pump truck, 46m mixing pump truck, four-axle 65m pump truck, cement truck, mobile unloadable mixing station and other star products.
