Product Description

There are both new and second-hand trucks. Just tell us your transportation needs and we will customize tractors with different loading weights, volumes, and colors. A good truck will help you work well.

Product Description of Crane Truck:

Column: The column supports the boom, hoisting mechanism and luffing cylinder, and is driven by the slewing system.

Slewing system: The slewing system generally includes a hydraulic motor, a hydraulic reduction box, etc., which makes the column slew.

Frame base: The base is directly installed on the chassis of the car, supporting the column and the leg frame.

Hydraulic oil tank: The hydraulic oil tank contains hydraulic oil dedicated to the truck crane, and plays the role of heat dissipation and sedimentation filtration.

Outrigger joystick: The outrigger joystick is used to control the telescopic action of the left and right outrigger cylinders.

Outrigger cylinder: During the operation of the truck crane, in order to stabilize the vehicle, the outrigger cylinder is extended to the ground to improve the operational stability of the truck crane.

Product Application of Crane Truck :

A truck crane is a special vehicle that uses a hydraulic lifting and telescopic system to achieve the lifting, rotation and lifting of goods. It is usually installed on a truck. A truck crane is generally composed of a truck chassis, a cargo compartment, a power take-off, a crane and outriggers. It can be used in daily mining, construction cleaning, handling, wood, sand pumping, etc.
