

Chinese Heavy Duty Truck Crane 160ton Mobile Truck Crane STC1600T7 With Promotional Price

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Dongfeng, Shacman, Howo
- Model Number: Crane Truck
- Minimum Order Quantity: 1
- Price: \$38,000.00/units ≥ 1 units
- Delivery Time: 10-20work days
- Payment Terms: L/C, D/A, D/P, T/T
- Supply Ability: ≥ 100 units

Product Specification

- Emission Standard: Euro -
- Engine: B190 33
- Transmission: DF6S900
- No. Of Gears: 6 Forward Gears & 1 Reverse
- Type: 4X2 6X4 8X4
- Driving Type: Left Hand Driving
- Tyre: 9.00R20
- Upload Brand: XCMG, SANY, CIMC
- Chassis Weights: 14490kg
- Max Torque: 670 N.m /1300-1500(rpm)
- Max Power: 132(KW) /2500(rpm)
- Engine System: Water Cooled,turbocharged,after Cooled
- Highlight: **heavy duty truck crane 160ton,
160ton china crane truck, 4x2 china crane truck**

Product Description

There are both new and second-hand trucks. Just tell us your transportation needs and we will customize tractors with different loading weights, volumes, and colors. A good truck will help you work well.

Product Description of Crane Truck:

PTO: The PTO lever (power take-off lever) is used to control the power output and cut-off of the engine to the truck crane.

Luffing cylinder: The luffing cylinder is the actuator that makes the crane arm tilt up or down.

Hook pulley block: By increasing or decreasing the pulley on it, the hoisting ratio is converted to directly hook the heavy object.

Wire rope: The output torque of the drum is transmitted to the hook.

Overwinding alarm device: When the hook pulley approaches the top of the boom, the overwinding alarm device automatically sends an alarm signal. This can prevent the wire rope from overwinding. The most advanced overwinding alarm device is the solar wireless anti-overwinding device that is standard on truck cranes such as Hongchang Tianma.

Rear outrigger: Installed at the rear of the vehicle's rear axle and connected to the beam to further improve the stability of the vehicle.

Product Application of Crane Truck :

A truck crane is a special vehicle that uses a hydraulic lifting and telescopic system to achieve the lifting, rotation and lifting of goods. It is usually installed on a truck. A truck crane is generally composed of a truck chassis, a cargo compartment, a power take-off, a crane and outriggers. It can be used in daily mining, construction cleaning, handling, wood, sand pumping, etc.

Product Features of Crane Truck:

Product Name	Crane Truck 4X2 6X4 8X4
Wheelbase	4500mm
Engine Model	B190 33
Emission Level	Euro
Fuel	Steel fuel tank, with lockable cap
Oil Tanker Capacity	160L
Tyre	9.00R20
Colour	As customer's request
Chassis Weights	14490kg
Provide After-sales Service	Video technical support, online support

▲ The values in the configuration table are subjected to change. The data in the configuration table are for reference only. Mix and matching some configurations may not be technically possible, please contact your local sales representative to help you choose the right specifications for your needs.
