### Product Description of Crane Truck:

Lifting equipment drivers must undergo professional safety training and be issued with qualification certificates after being assessed and approved by relevant departments before they are allowed to operate alone. It is strictly forbidden for unlicensed personnel to use lifting equipment.

Before work, it is necessary to check whether each operating device is normal, whether the wire rope meets safety regulations, and whether the brakes, hydraulic devices and safety devices are complete and sensitive and reliable. It is strictly forbidden to operate the machine with defects.

The boom elevation angle shall not be less than 30°, and the crane should try to avoid raising and lowering the boom under load. It is strictly forbidden to change the joystick before the boom is raised and lowered safely.

### Product Application of Crane Truck :

A truck crane is a special vehicle that uses a hydraulic lifting and telescopic system to achieve the lifting, rotation and lifting of goods. It is usually installed on a truck. A truck crane is generally composed of a truck chassis, a cargo compartment, a power take-off, a crane and outriggers. It can be used in daily mining, construction cleaning, handling, wood, sand pumping, etc.
