Product Description

There are both new and second-hand trucks. Just tell us your transportation needs and we will customize tractors with different loading weights, volumes, and colors. A good truck will help you work well.

Product Description of Aerial Work Truck:

Through the front bracket of the boom, the lifting device or manned platform can be quickly installed to realize functions such as material lifting, hoisting and manned aerial work, and at the same time provide an interface for the expansion of the working device and the rapid switching of various working devices.

The designed three-dimensional rotating lifting device can not only automatically maintain the posture of the lifted material, but also realize the adjustment requirements of the lifted material at any height, any position and any direction in the space. The speed control is precise and sensitive, and the micro-motion performance is good, which meets the requirements of aerial work and ventilation duct installation in large caverns.

The telescopic boom aerial work platform is a product that serves the mobile aerial work such as aerial work, equipment installation, and maintenance in various industries. The telescopic boom aerial work platform is mainly divided into straight boom aerial work platform and flex boom aerial work platform. It is mostly used in places with high height requirements such as shipyards. This type of machine has good safety and is easy to move, but the cost is very high.

Product Application of Aerial Work Truck:

Aerial work vehicles are mainly used for project leasing, curtain wall construction, rooftop waterproofing, solar energy installation, monitoring installation and maintenance, advertising installation, power maintenance, air conditioning installation, ship maintenance, road and bridge repair, etc.

The operating height can reach 30 meters, and the maximum load weight is 200 kg. Blue license plate, C license driving, free of purchase tax.
