

20 Meter Aerial Work Vehicle That Can Be Lifted , Hoisted , Pulled And Operated

Basic Information

- Place of Origin: China
- Brand Name: Howo, Isuzu, JMC
- Model Number: Aerial Work Truck
- Minimum Order Quantity: 1
- Price: \$38,000.00/units ≥ 1 units
- Delivery Time: 10-20work days
- Payment Terms: L/C, D/A, D/P, T/T
- Supply Ability: ≥ 100 units

Product Specification

- Product Name: Euro -
- Working Height: 30M
- Working Bucket Rated Load: 200kg
- Operating Position: Turntable/remote Control/display Screen Operation
- Type: 4X2 6X4 8X4
- Driving Type: Left Hand Driving
- Vehicle Size: 5998*2100*3200(mm)
- Total Mass: 4495(kg)
- Wheelbase: 3280(mm)
- Engine: WEICHA130/140
- Working Desk Size: 1600*680*1000(mm)
- Engine System: Water Cooled,turbocharged,after Cooled
- Highlight: 20 Meter aerial work vehicle,
Lifted aerial work vehicle,

Product Description

There are both new and second-hand trucks. Just tell us your transportation needs and we will customize tractors with different loading weights, volumes, and colors. A good truck will help you work well.

Product Description of Aerial Work Truck:

The power transmission device includes the power transmission part of each working device of the aerial work vehicle. Common transmission modes include internal combustion engine-mechanical transmission, electric-mechanical transmission, internal combustion engine-electric transmission, internal combustion engine-hydraulic transmission, etc.

The power source is the automobile engine. After the power is transmitted through the transmission, it is transmitted to the working device through the transfer case, clutch, reducer, winch, pulley and wire rope. The transmission line is long and the structure is complex. It is only used in aerial work vehicles with a single purpose.

Using external power supply or vehicle power supply, the electric energy is converted into mechanical energy through the motor, and then the power is transmitted to each working device through the mechanical transmission device. Because the motor has the characteristics of reversibility and stepless speed regulation within a large speed range, and each mechanism can have an independent motor drive, the transmission and control mechanism are simplified, and the noise is small and the pollution is less. It is suitable for site operations where external power supply is convenient or the mobility is not large.

The transmission route is automobile engine-generator-motor, and then drives each working device to operate. Its advantage is that it uses the excellent working characteristics of DC motors to enable aerial work vehicles to obtain good operating performance, but it is heavy and expensive.

It can make full use of the advantages of hydraulic transmission, simplify the transmission structure, and easily achieve stepless speed regulation and changes in movement direction. The transmission is smooth, the operation is simple and labor-saving, and it can prevent overload. Therefore, most aerial work vehicles adopt this transmission method.

Product Application of Aerial Work Truck:

Aerial work vehicles are mainly used for project leasing, curtain wall construction, rooftop waterproofing, solar energy installation, monitoring installation and maintenance, advertising installation, power maintenance, air conditioning installation, ship maintenance, road and bridge repair, etc.

The operating height can reach 30 meters, and the maximum load weight is 200 kg. Blue license plate, C license driving, free of purchase tax.

Product Features of Aerial Work Truck:

The platform load of the work vehicle is 200KG, and the maximum working height is 30m	
Wheelbase	3280mm
Engine Model	WEICHA1130/140
Emission Level	Euro
Cab	Accommodate 3 people, equipped with air conditioning
Power take-off system	Mechanical operation
Brand	Howo/Isuzu/JMC
Colour	As customer's request
Vehicle Weights	4495kg
Provide After-sales Service	Video technical support, online support

▲ The values in the configuration table are subjected to change. The data in the configuration table are for reference only. Mix and matching some configurations may not be technically possible, please contact your local sales representative to help you choose the right specifications for your needs.

FAQ

1.Q: What kind of payment do you accept?

A: We accept T/T; L/C and Western Union; Others payment is negotiable.

2.Q: What's your minimum order quantity?

A: One unit

3.Q: What's your delivery time?

A: Determine according to the specific model. Dump truck usually 30 days after received the deposit.

4.Q: What's warranty time?

A: 30,000 km or 12 months from the date of shipment whichever comes first

5.Q: What's your after-sale service?

A: We provide technical support for our trucks and whole life parts supply
