## Product Description

There are both new and second-hand trucks. Just tell us your transportation needs and we will customize tractors with different loading weights, volumes, and colors. A good truck will help you work well.

### Product Description of Van Semi Trailer:

The vehicle body is a rod and cabinet frame structure, with a light structure and light weight. Most of them are upper and lower loading platforms. The platform adopts hydraulic cylinder opening, wire rope pulley structure, stable lifting, and multiple height positioning.

Light structure: The whole vehicle adopts a truss structure, the frame is integrally loaded, and there is no longitudinal beam structure of a semi-trailer. The deadweight is light, which is about 30% lighter than the deadweight of similar vehicles.

Safe and convenient operation: All loading and unloading platform lifting and control operations are reliable, and can be clearly observed and accurately operated.

Suspension system: It adopts a unique leaf spring under-mounted suspension system, variable-section leaf springs, and good driving smoothness.

### Product Application of Van Semi Trailer:

General Freight Transport: Ideal for moving a diverse range of goods, from consumer products to industrial materials, across supply chains.

E-commerce Logistics: Seamlessly integrate into the last-mile distribution networks of online retailers, delivering parcels and packages efficiently.

Furniture & Appliance Delivery: Provide secure, damage-free transport for bulky, fragile household items from manufacturers to retail outlets.

Construction Material Haulage: Facilitate the movement of building supplies, equipment, and tools to project sites.

Disaster Relief Operations: Can be rapidly deployed to disaster-affected areas to transport emergency supplies and humanitarian aid.
