Product Description

There are both new and second-hand trucks. Just tell us your transportation needs and we will customize tractors with different loading weights, volumes, and colors. A good truck will help you work well.

Product Description of Refrigerated Semi Trailer:

The inner and outer skins are whole preformed fiberglass sheets with a white and smooth surface. The thermal conductivity of the fiberglass sheet is much lower than that of metal sheets and other materials. It is currently the best skin material for refrigerated trucks.

Fuel Efficiency: Advanced powertrain designs and aerodynamic trailer profiles maximize fuel economy for cost-effective refrigerated transport.

The car body is formed by hot pressing of integral panels, with inner and outer skins made of fiberglass panels, a core layer of polyurethane foam board insulation material, and fiberglass reinforcement ribs between polyurethane panels, all of which are lightweight and high-strength materials.

Product Application of Refrigerated Semi Trailer:

The overall strength of the compartment panel is high, light, and it is resistant to acid, alkali, and corrosion.

Food & Beverage Distribution: Ideal for transporting perishable goods like fresh produce, dairy, meat, and frozen foods while maintaining optimal temperatures.

Pharmaceutical Logistics: Safely deliver temperature-sensitive medical supplies, vaccines, and pharmaceuticals to healthcare facilities and pharmacies.

Catering & Hospitality: Provide reliable cold chain transport for high-end catering and hospitality businesses to deliver fresh, chilled ingredients.

Retail Supply Chains: Integrate seamlessly into retail distribution networks, ensuring temperature-controlled delivery of goods to store shelves.

Emergency Response: Can be rapidly deployed to disaster areas to deliver vital refrigerated supplies for relief efforts and humanitarian aid.
