Product Description OF Shacman Tractor Truck:

SHACMAN tractors are used to tow and push heavy-duty trailers. They are equipped with powerful diesel engines and mechanical or hydraulic transmission devices that can effectively provide high-speed ratios and final reducers. Some models also include wheel rim reduction devices for enhanced traction control.

The advantages of SHACMAN tractors are excellent performance in efficiency, safety, comfort and intelligent network integration. They feature high efficiency, low fuel consumption, intelligent design, and engine displacements ranging from 10 to 13 liters. The cabin is equipped with four-point airbag shock absorption, Grammer aviation seats and advanced noise reduction technology.

The body is precision welded by ABB robots, with a 100% automation rate, precise welding, and even distribution of welding spots. This process ensures structural integrity and impact resistance in harsh environments.

And SHACMAN tractors are also equipped with aluminum alloy three-stage pedals with pedal lights and anti-skid protection. The use of polyester in the cockpit significantly reduces noise and improves thermal insulation.

Product Application OF Shacman Tractor Truck :

The top of the container tractor cab has undergone strict pressure resistance testing, with excellent safety performance and better guarantee of product quality. The thickened cab steel plate and side door anti-collision beam design effectively enhance the passive safety of the cab. This tractor can handle basic transportation needs and handle some complex tasks.
