Product Description of Crane Truck:

The truck-mounted crane models currently produced by our company adopt the same design and quality control standards as Europe.

Advanced processing technology and design concepts combined with high-strength steel increase customers' cargo capacity and improve fuel economy

Telescopic boom, flying boom remote control, winch, auxiliary tools, etc. can be selected from the factory according to customer needs, with mature design solutions.

Telescopic arm high-speed motion system, increased hydraulic pressure makes the cylinder move faster.

Product Application of Crane Truck :

A truck crane is a special vehicle that uses a hydraulic lifting and telescopic system to achieve the lifting, rotation and lifting of goods. It is usually installed on a truck. A truck crane is generally composed of a truck chassis, a cargo compartment, a power take-off, a crane and outriggers. It can be used in daily mining, construction cleaning, handling, wood, sand pumping, etc.

Used for setting up and maintaining telecommunication towers, providing necessary height for equipment installation and repairs.

Truck-mounted cranes are widely used to lift and position materials on construction sites, enabling efficient handling of heavy items like steel beams and precast concrete panels.
