### Product Description of Crane Truck:

The truck-mounted crane models currently produced by our company all adopt the same design and quality control standards as those in Europe.

Effectively combine advanced processing technology and design concepts with high-strength steel to increase customers' cargo capacity and improve fuel economy.

Customers can choose telescopic arms, flying arm remote controls, winches, auxiliary tools, etc. from the factory according to their personal needs, and our company also provides mature design solutions.

All models come standard with high-pressure filters to improve oil cleanliness, reduce crane failures and extend service life. And equipped with extra-large span rotating legs.

Telescopic arm high-speed movement system, the increased hydraulic pressure makes the cylinder move faster.

### Product Application of Crane Truck :

Crane truck crane is a special vehicle that uses a hydraulic lifting and telescopic system to lift, rotate, and transport cargo. It is usually mounted on a truck. Truck cranes generally consist of a vehicle chassis, cargo cabin, power take-off, crane and outriggers. It can be used for daily mining, building cleaning, handling, lumber, sand pumping, etc.
