Product Description

There are both new and second-hand trucks. Just tell us your transportation needs and we will customize tractors with different loading weights, volumes, and colors. A good truck will help you work well.

Product Description of Aerial Work Truck:

The main functions of the electronic control system are: controlling engine start and stop, and displaying the main arm length.

Control the boom rotation, pitch, extension, working platform rotation, angle adjustment, etc.

Control the working platform to rotate left and right, and tilt forward/backward.

The start and stop deceleration function greatly increases the safety during operation.

Safety protection: important safety matters are equipped with alarm function and automatically complete protection actions.

The platform can rotate 360 degrees left and right, and the hanging basket is made of high-strength stainless steel, which is flexible in operation.

Product Application of Aerial Work Truck:

Essential for installing and repairing cellular antennas and wiring on tall structures, ensuring rapid access to critical infrastructure.

Aerial work vehicles are mainly used for project leasing, curtain wall construction, rooftop waterproofing, solar energy installation, monitoring installation and maintenance, advertising installation, power maintenance, air conditioning installation, ship maintenance, road and bridge repair, etc.

Commonly deployed for maintaining HVAC systems, electrical installations, and signage, enabling easy access to elevated areas without scaffolding.
