Product Description

There are new trucks and used trucks. Please tell us the specific information about the items you are transporting, and we will recommend the one that best suits you. A good truck will help you get the job done smoothly.

Product Description of Concrete Pump Truck:

The vehicle is equipped with rotation anti-swing control technology: using new rotation braking technology, the arm rotation and swing range is reduced by 60% to achieve braking.

The advantages of vehicles are significantly lower labor costs and higher output rates compared to traditional concrete pouring methods.

Incorporates safety features such as emergency shutdown mechanisms and stability monitoring systems.

Equipped with faulty self-diagnosis technology: it can monitor and diagnose more than 150 faults in real time, effectively shortening the troubleshooting time by 70%.

Product Application of Concrete Pump Truck :

The vehicle is equipped with a remote control operation function that can accurately position it in complex environments.

Incorporates safety features such as emergency shutdown mechanisms and stability monitoring systems.

Dedicated to serving urban and rural infrastructure, it is an enterprise specializing in the production of large-scale construction engineering machinery and equipment, integrating scientific research, production, sales and after-sales service.

Capable of maintaining continuous flow, which minimizes interruptions during pours.

The vehicles are designed for use in a variety of construction sectors, including commercial, residential and civil engineering.
