Product Description

Product Description of Fire Truck:

Fire fighting truck is composed of the tank, pump room, equipment boxes, power output and transmission system, piping systems, electrical systems and other components.

It is widely used in urban public security fire brigades, petrochemical, industrial and mining enterprises, forests, ports and other departments. It can quickly approach the fire and start fire fighting, extinguish various kinds of fires; it is an ideal fire-fighting equipment.

Product Application of Fire Truck :

Cooling down. Sprinkling water on the road surface in hot weather can help lower the temperature and protect the road surface, because if the temperature is too high, the road surface will crack.

Dust removal. The road surface is dusty, and sprinkling water can moisten the dust, effectively preventing the dust from flying up, thereby reducing air pollution.

Greening and gardening, watering roadside flowers and trees, or washing dust off trees. Used as a fire truck in an emergency.
