### Product Description of Concrete Pump Truck:

**Compact Design:** To adapt to the narrow construction environments in cities, some pump trucks feature a compact design, making the vehicle more maneuverable and easier to move around in crowded job sites.

**Customization Services:** Manufacturers often offer customization services, tailoring the length of the boom, pumping capacity, and other parameters of the pump truck according to the specific needs of the customer.

**Global Positioning System (GPS):** Some pump trucks may be equipped with GPS systems for vehicle location, route planning, and remote monitoring.

**Emergency Retrieval System:** In the event of a power or hydraulic system failure, pump trucks are usually equipped with an emergency retrieval system that can quickly retract the boom to a safe position.

### Product Application of Concrete Pump Truck :

The vehicle is equipped with a remote control operation function that can accurately position it in complex environments.

Incorporates safety features such as emergency shutdown mechanisms and stability monitoring systems.

Dedicated to serving urban and rural infrastructure, it is an enterprise specializing in the production of large-scale construction engineering machinery and equipment, integrating scientific research, production, sales and after-sales service.

Capable of maintaining continuous flow, which minimizes interruptions during pours.

The vehicles are designed for use in a variety of construction sectors, including commercial, residential and civil engineering.
